

# Official Opening of the National Drilling & Well Control Program's Perth Training Facility

By the Hon. Francis Logan  
Minister for Energy; Resources;  
Industry & Enterprise

# INVITATION TO OPENING

- Monday 31<sup>st</sup> March 2008
- 1.00pm
- Technology Park Business Centre.  
Suite 3, 18 Brodie Hall Drive, Bentley, WA

# General Information

- NDWCP is a collaborative activity between the Australian oil and gas industry and the School of Petroleum Engineering at UNSW.
- Established in 1998 to provide training in safe and efficient drilling and production operations for land and offshore oil and gas drilling rigs.

## Continued...

- NDWCP is accredited by the industry's leading professional bodies:
  - International Association of Drilling Contractors (IADC): Wellcap &
  - International Well Control Forum (IWCF).

# General Information

- BOP certificates required to work on a rig;
- Certification every two years
- Nearly 40 courses are offered annually;
- About 400 professionals trained per year;
- Training centres in Brisbane and Perth;
- Perth centre is the houses Australia's only full rig floor simulator.

# State of the art training equipment

- Newly installed full rig floor drilling and well control simulator – DS5000;
- DS5000 simulates one-to-one scale real life drilling operations.

In addition already have:

- Portable DS500 and DS50 and
- 2 x PC Based Drilling Simulator – DS5

The result is a modern and stimulating training environment.
