

DROPS

DROPPED OBJECTS PREVENTION SCHEME

“Working to make our
industry a safer place”

DROPS
DROPPED OBJECTS PREVENTION SCHEME

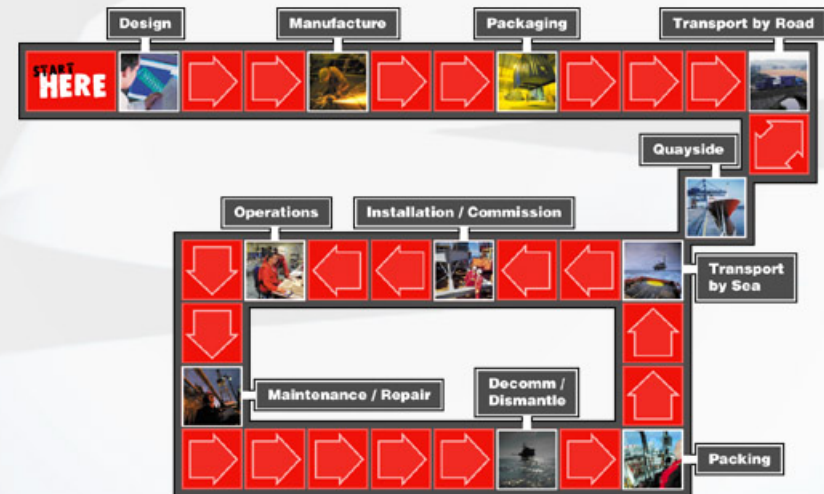

DROPS objectives

- Eliminate injury to people and damage sustained to equipment due to dropped objects throughout the full supply chain
- Ultimately to deliver a **'second-nature'** dropped objects prevention strategy

Workgroup Members

- Over 50 companies all sharing commitment and enthusiasm for dropped object prevention.
- Basic remit to consider and review all avenues available for improving the industry's dropped object prevention performance.
- Distil and identify key learnings and deliver these to industry effectively as awareness, best practice, recommendations, lessons, tools and techniques.

- Assign specific focus groups to work each key issue to its conclusion as an effective deliverable product.
- Meet regularly to review progress, share best practice and lessons learned, prioritise focus areas and present new technologies / services.
- **DROPS Work Group** members all participate, contribute and help drive the direction and deliverables of the Campaign. Each brings their own organisation's influence and concerns to **DROPS**.

- **DROPS** has produced a broad array of tools, products and deliverables, including inspection programmes, awareness videos and presentations, safety checklists, guidelines, procedures and best practices.
- Marketing concept is a workpack system, where **DROPS workpack** contains all **DROPS** products to date with option to subscribe to future updates.
- Workpack format ideal for individual assets, eg platforms, rigs, terminals, bases and now hundreds in use around the world.

Train the Trainer Courses

The DROPS Training / Awareness Course is a modular and flexible training package designed to raise awareness of dropped object prevention throughout the oil and gas industry and beyond. The programme is based upon Industry and DROPS Forum lessons learned and associated best practices.

The training is suitable for offshore and onshore audiences and captures the best practice and lessons learned by the DROPS Workgroup and its members. DROPS supply the course materials and deliver “Train-the-Trainer” familiarisation courses such that you, or your designated Training Provider, can cascade the awareness training throughout your organisation.

Deliverables

- **www.dropsworpack.com** is the main vehicle for presenting and marketing our products and giving access to free downloads, alerts, contacts, news and general **DROPS** information.
- Developing more products and deliverables is an ongoing process – effectively the output of the **DROPS Work Group** .
- Sale of Campaign Packs and Work Group Membership subscriptions provide the revenue for ongoing product development on a self-sustaining basis.

A Great Idea!

At the last DROPS forum, a presentation was delivered showing a unique solution to the problem of potential dropped objects falling from container pockets - an issue highlighted in our last Newsletter!

The solution is a mechanised and environmentally friendly ultra high pressure cleaning tool capable of removing all debris and heavy rust deposits from the container pockets and base frames in a safe and effective manner. The solution is currently being reviewed by the DROPS Best Practice Sub-committee. Kind thanks to Denholm Industrial Services.

Join the DROPS Campaign!

Have you considered joining the growing band of DROPS Workgroup Members? At present, we have 40+ participating companies and we meet every eight weeks in Aberdeen. As a member organisation, you are invited to all Forum meetings, issued with a free campaign pack and you are instrumental in driving the direction and deliverables of the Campaign. At the Forum meetings, we exchange best practice, present new tools and techniques and discuss performance in an open and collaborative environment. For further details on DROPS membership, contact campaignteam@dropsworpack.com.

Any Ideas?

If you have any ideas, comments or suggestions that you wish to share with the DROPS Team, send us the details or drop us an email:
