## *Rig 104 1 Year without a Lost Time Incident*

Rig 104 reached 1 year without a Lost time Incident on the 26<sup>th</sup> October 2009.

No Lost Time Incidents since contract commencement.

## *Reaches 1,000,000 man-hours without a LTI*

- In the early hours of this morning (30th September PNG Time) HAES PNG passed 1,000,000 man-hours without a Lost Time Incident.
- We had
  - driven in excess of 840,000 kilometres throughout this period without any serious vehicle incident.
  - conducted 36 rig moves. This number includes HWU rig moves, separate LF and main rig package moves including final stacking.
  - Completed 3 rig skids to next well on the same location. A number of other skidding has taken place to move the rig off the well to rig down.
  - drilled nearly 23,000 metres of hole.

- Part of the reason for our success is our proactive approach to identifying hazards and reporting incidents. During the 1,000,000 man-hours without a Lost Time Incident we have:
  - submitted 21,161 Stop Cards (13,525 safe, 7,636 unsafe)
  - submitted 4,745 Hazard Cards (4736 or 99.8 percent have been closed out)
  - continued to report all incidents. 160 incidents reported. 57 percent represented by first aid cases, near misses and report only. 7 percent represent medical treatments. The remaining 37 percent represent minor damage and environmental reporting.

## *Part of the success, cont....*

- At the end of 2008 we set a target of reduction in frequency rates (LTI and Recordable) for 2009 to be less than IADC Asia Region figures at the end of 2008.
- Meaning for
  - LTI we needed to reduce our LTI frequency rate to  $<2.04$  a reduction of 26 percent on 2008 (2.77). To date we have a frequency rate of ZERO. A 100 percent reduction.
  - Total Recordables our aim was to reduce our frequency rate by 60 percent from 13.87 to  $<5.62$  (from 10 incidents to 4). Right now we are 71.9 percent better than 2008 with 3 recordable incidents. If we exclude the POM incident (not field related - hi-jacking) it's only two and a 81.2 percent improvement.

*Thank you*
